

Chemical Peels

Treat your skin to an experience that is as enjoyable as it is effective.

Glo therapeutics and vivier skin chemical exfoliant treatments provided customized solutions to help you achieve subtle, gradual or astonishing transformations for your skin. Whether you are concerned with dull, lackluster skin, fine lines, imperfections or discoloration there is a chemical peel treatment for you. Glo therapeutics and vivier skin peels offer the best of both worlds: pharmaceutical grade ingredients and active fruit extracts that are as pleasurable as they are effective.

FAQ?

WHAT ARE THE RESULTS FROM A CHEMICAL PEEL?

Post treatment you can expect to see fresh, smooth, even and healthy tone to your skin. Advanced exfoliations may soften fine lines, clear imperfections, and lighten hyperpigmentation. Results can be enhanced with proper homecare skin products.

CAN I STILL HAVE A CHEMICAL PEEL IF I AM TAKING PRESCRIPTION MEDICATION?

Chemical peels are not recommended while on certain medications. It is important to speak with your skin care specialist and or doctor to determine if the treatment is right for you.

HOW MANY TREATMENTS DO I NEED AND HOW OFTEN?

Receiving a series of chemical peels will yield the best results. Your skincare specialist will guide you through the program that consists of treatments and home care products suitable for your specific concerns. On average a minimum of 4-6 treatments are recommended. Any where from every 2-6 weeks dependent on how aggressive the chemical peel.

WILL I EXPERIENCE SLOUGHING OR PEELING?

The amount of sloughing you experience varies depending on the chemical peel intensity, home care products and your skin's condition. The amount of peeling you see is NOT an indication of the effectiveness of the treatment.

WILL THE CHEMICAL PEEL BE PAINFUL?

You may experience different sensations during the treatment ranging from slight tingling to the feeling of hot skin, comparable to a mild sunburn.

WHAT TO EXPECT POST CHEMICAL PEEL?

Skin may feel dry, tight and appear mildly red
swelling may naturally occur and last anywhere from 12-24 hours
you may experience mild to moderate peeling 3-7 days post treatment

POST PEEL RECOMMENDATIONS
